OBJECTIVES AND SCOPE

One of the primary objectives of the Pesticides Documentation Bulletin is to inventory the multidiscipline literature in the pest control fields and disseminate it to interested personnel in the Department of Agriculture and other Federal departments and State, private, and industrial organizations.

The Bulletin is an index to the literature on pests and their control and the impact on the economy and man's total environment. The index will include literature on diseases, insects, nematodes, parasites, weeds, and other pests affecting plants, animals, man, our natural resources, and other values in man's environment. Literature on biological, chemical, cultural, ecological, mechanical, and integrated methods of pest control will be included. Special emphasis will be given to the literature on the biological, toxicological, physiological, biochemical, pathological, biophysical, and epidemiological aspects of pests and their control by chemical and nonchemical methods.

FORMAT AND USE

The Bulletin is a computer-produced permuted title index in three parts: Keyword Index, Bibliography, and Author Index.

KEYWORD INDEX. This is an alphabetic listing of significant words in titles. Each word has been lifted out and printed on the left margin of the column, followed by the listing of all titles containing that word. As a rule titles are left intact, although some are supplemented by inserting significant words taken from the text. These supplemental words are mainly the names of organisms and chemicals, and are shown within plus signs.

Words deemed insignificant are not printed as keywords; however, they are retained in their original place in the title. Words beginning with digits, such as some chemicals, are shown at the end of the alphabetic listing. Special characters which are not recognized by the computer as words, such as Greek letters, are spelled out.

Titles in foreign languages are given in English only, with the language of the text shown in parentheses after the title.

Having scanned the Keyword Index for significant words and having determined the likely title, the next step is to note the number which has been assigned to each title. This number locates the title in the Bibliography part where full bibliographic data about the title are given.

BIBLIOGRAPHY. This is both a numeric and an alphabetic arrangement of titles by their senior or primary authors. Titles having no authors are designated ZZ Anonymous and are listed at the end of the regular alphabetic listing.

Abbreviated names of the publications cited follow the form used in the Bibliography of Agriculture.

The last element in each citation is the National Agricultural Library classification number which should be used when requesting loans or reproduction of articles.

AUTHOR INDEX. All authors are indexed but the number is that of the senior or primary author.

AVAILABILITY OF REFERENCES CITED

Loans. Most of the material in the National Agricultural Library collection may be borrowed by employees of the Department of Agriculture and by other libraries. In requesting loans, please include the library call number found at the end of the citation. Loan of periodicals is restricted to the Washington, D. C. area. Foreign statistical publications and rare books are loaned only by special arrangement.

Free Distribution. Most of the printed publications of the Department of Agriculture and publications issued by the State Experiment Stations and the State Agricultural Extension Services may be obtained free of charge by applying direct to the issuing agency. The National Agricultural Library does not distribute them.

Reproduction. All articles listed may be obtained in microfilm or photoprint form from the Photoduplication Section, National Agricultural Library, Washington, D. C. 20250. Copying charges for each periodical article or book are:

MICROFILMS: \$1.00 for each 30 pages or fraction copied from a single article or book.
PHOTOPRINTS: \$1.00 for each 4 pages or fraction copied from a single article or book.
RUSH SERVICE will be furnished upon payment of \$1.00 additional for each order.

Payment must accompany the order. Cash, Library coupons, check or money order drawn to the National Agricultural Library, USDA, are acceptable. Payment for orders originating outside of the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Superintendent of Documents coupons and requests to furnish photocopy to be paid from Superintendent of Documents Deposit funds cannot be honored. Credit may be extended only to Government agencies and institutions. Billing address should be indicated.

Library Coupons. Library coupons, valued at \$1.00 each, may be purchased in any quantity from the Photoduplication Section, National Agricultural Library, Washington, D. C. 20250.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402
\$12.00 per year, domestic; \$15.00 per year, foreign. Single copies vary in price.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget (March 29, 1966)

ACKNOWLEDGMENT

The Pesticides Information Center, National Agricultural Library, gratefully acknowledges the cooperation and assistance of the Departments of Defense; Health, Education, and Welfare; and Interior; the Federal Committee on Pest Control, and State and industrial organizations in the development of the Center and preparation of this Bulletin. Special thanks are expressed to the Federal Committee on Pest Control for its suggestions and support. We hope the Bulletin will serve as an example of the effectiveness of interdepartmental cooperation and the speed with which effective services can be developed through a coordinated and cooperative interdepartmental effort.

DEADLY YELLOW LEAF +RCLL+ VIRUS THREATENS PEACH INDUSTRY.		13121
ROOT ROT AND ROOT MICROFLORA OF ALFALFA AS AFFECTED BY POTASSIUM NUTRITION, FREQUENCY OF CUTTING, AND LEAF INFECTION.		13122
EFFECT OF CHLORINATION OF WATER ON CONTROL OF BACTERIAL LEAF BLIGHT OF RICE, CAUSED BY XANTHOMONAS-ORYZAE-AND-ISHIYAMA-EDMONSON.		13134
THE LEAF SPOT OF PISTACIA, ABOUT PISTACIA-VERA-L. (FRENCH)		13224
A STUDY OF THE BIOLOGY AND CONTROL OF TOMATO LEAF SPOT (SEPTORIA-LYCOPERSICI-SPEG.) IN THE REGION OF THE VAROAR-RIVER.		13230
BACTERIAL WILT AND STEWARTS LEAF BLIGHT +XANTHOMONAS-STEWARTII+ OF CORN.		13231
A MICROENVIRONMENT CHAMBER FOR CRITICAL CONTROL OF RELATIVE HUMIDITY +TO STUDY THE EFFECT OF SEPTORIA LEAF BLOTCH-DISEASE OF BARLEY (HORDEUM-VULGAE) INCITED BY SEPTORIA-PASSERINII+.		13236
PHARMACOGNOSTIC STUDY OF THE STEM AND LEAF OF LANTANA INDICA-ROXB.		13323
LEAF-MINERS		
OBSERVATIONS ON SOME AUSTRALIAN FOREST INSECTS. 22. NOTES ON SOME AUSTRALIAN LEAF-MINERS.		13057
LEAF-MINING		
ANNOTATED KEYS TO SOME NEARCTIC LEAF-MINING LEPIDOPTERA ON CONIFERS.		12646
LEAFHOPPER		
NONPERSISTENCE OF THE TUNGRO-VIRUS OF RICE IN ITS LEAFHOPPER VECTOR, NEPHOTETTIX-IMPACTICEPS.		12953
LEAFLETS		
ROSES AND BLACKSPOT. I. PATHOGENICITY TO EXCISED LEAFLETS OF DIPLOCARPON-ROSAE FROM SEVEN GEOGRAPHIC LOCATIONS.		13136
LEAFROLLERS		
INVESTIGATIONS OF THE INFLUENCE OF THE SMALL RED FOREST ANT (FORMICA-POLYCTENA-FOERSTER) IN THE OUTBREAK OF GREEN OAK LEAFROLLERS (TORTRIX-VIRIDIANA-L.). (GERMAN)		12693
LEARNING		
LEARNING TO LIVE WITH METABOLIC DISEASES IN BEEF CATTLE.		13337
